Medical IT : the Main purpose of our job is to centralized ALL systems to one HEADQUARTER so it will managed correctly and can be developed in perfect way and LAST to put the suitable marketing plan depending on the centralized data & that it save time and money……..cost effect .

1- X-Ray Device solution to connect multi Dental room to one X-ray device without duplicating the file number of patients Since the X-ray Device not accept more than 1 Connection (This Solutions not available at the X-ray Company OWANDY).
2- Integrate the Clinic Software with external module to connect it to X-Ray device & pushing the X-ray photo into the patient file.
3- Connect the Dental Chair to the Radiology Devices & Broad-Cast the X-Ray Photo to second Screen while the doctor working
4- Connected many clinics inside UAE & outside UAE to one Headquarter Database to give patient opportunity to continue the medication over ALL clinics abroad.

5- Since the Medical field was connected to TV show it was necessary for big photos Data to be flow between many different sections (CLINIC-TV-DESIGNING-MANAGERS) & to be upload finally to TV SHOW for published……!
    1- Design & Achievement High security level of data workflow since complicated data transfer was going to finalize each project.
    2- Convert the current Storage servers into cloud technology.
    3- Managing &Synchronizing ALL Designing software Accounts (Adobe Business) under cloud technology to push the projects to a fast flow.
    4- Achievement of high level of ghost Data to keep the main data save EVEN if somebody tried to delete the data and delete it really (ALL SAVED).
    5- Early Alarm at any point with hacking trying at any cloud server.
    6- Design & Achievement Anti-Fraud Systems compatibles with different systems category.

HR Section: the Main purpose of our job is to centralized ALL Biometric systems & devices to one HEADQUARTER so it will integrated to HR Systems & managed correctly then each employee will assign& broadcast fingerprint all over the group SO it can tracking his moving between the branches with his timeline.

1- Integrate the HR systems with the clinics systems then linked them to accounting systems SO finally we have small ERP systems which managed the HR needs with no over coast.
2- Centralized Biometric Control.
3- Centralized Cameras Control.

Development Department: every organization it has its software and flow-systemized, our mission to study current situation and offer the suitable way to develop the organization to take it to the next future level (international-Level) ……………
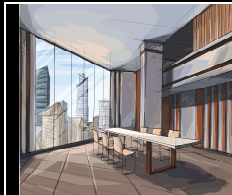

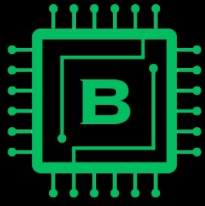

Decorations Department: Supply the suitable technology solutions for the decoration project to give premium touch to the project & to provide the international requirement which not available in middle east.

Logistic Department: Providing all the cars with the latest technology of GPS tracking systems which it can control the logistic movement of all company cars and full notification if any misuse the cars OR denied areas OR over-speed driving .
